• COMPANY PROFILE

A vertically integrated natural products manufacturing company having facility in Gujarat Ahmedabad, various private label brands to different companies across the country and overseas. Since years we believe that we have changed the industry in many ways and trying to set new standards in product formulations development, branded ingredients and new ingredients development with competitive pricing to give our esteemed clients a competitive edge over others apart from providing highest quality products.

These features help achieve the creative solutions that support our customer's health and nutrition formulation goals.

Pamsiddh Lifescience is a leading manufacturer and marketer of Nutraceutical formulations in several therapeutic segments in dosage forms of Tablets, Capsules, Oral Liquids, Dry Syrup, Powder, Sachet, Effervescent, Gummy and Diskettes.

We introduce ourselves at Nutra Healthcare to provide quality and integrity to thousands of clients. Once we satisfy client's needs, only then the customer will truly benefit from our superior quality products.

Combining years of experience in retail and contract manufacturing, our team leaders have extensive knowledge of the Health Supplement Industry. The key to a great product is quality ingredients, sourced from the best suppliers. Our team knows that it is not simply what is put in a supplement, but the precision and core integrity of the ingredients that makes a truly outstanding product.

● COMPANY SERVICES

CONTRACT MANUFACTURING

We offer a significant amount of contract manufacturing where we will create natural health based upon individual and proprietary formulas. This includes both solid and liquid formulation.

We are constantly involved in research and development to find better formulas and higher quality ingredients to have a greater impact on the end users. We have worked with Nutraceutical firms from around the globe to offer contract manufacturing.

Equipped with modern, comprehensive and specialised manufacturing equipment services, our expertise and experience are available to clients seeking the manufacture and packaging of therapeutic goods.

Our team is equipped with the expertise and facilities to turn your idea in reality, with a measure of advice, recommendation and refinement along the way.

Our clients may come to us with a developed concept and require us to manufacture it for them. Others arrive with an idea or intention and are looking for assistance to develop the product to achieve the goals they have in mind. Either way, we are proud to continue to have an open-door policy to our existing and potential clients. We invite you to contact us at whatever stage your project is at, so we can assist with formulating a solution.

We can develop products for specific dietary requirements - vegan, gluten free, nut free and organic.

• RESEARCH AND DEVELOPMENT

Product Development

Our Product Development program draws upon Pamsiddh Lifescience extensive expertise in manufacturing and Nutraceutical knowledge. Dedicated to innovation, our technical experts are rigorous in identifying and sourcing the latest research in Nutraceutical to apply in the manufacture of therapeutic goods.

In working in close collaboration with our manufacturing teams, production design is embodied directly into the R&D process to ensure successful commercial- scale production. The result is an innovative, effective and attractive finished product ready for market shelves.

Regulatory

Product registration for overseas markets

Dossier collation and preparation

Permitted ingredient levels and forms

Product specification

Regulatory assistance in international markets

Claim substantiation

Label compliance

● SUPPLY CHAIN

Stability testing programs are required to demonstrate that complementary and Nutraceutical products continue to meet or exceed designated acceptance criteria through a product's stated shelf life period.

Pamsiddh Healthcare provides its customers with range of comprehensive product stability and testing services across a range of internationally recommended storage profiles.

Our knowledge of material stability profiles on stand-alone or combination actives is fed back into formulation development, ensuring minimal formulation changes across the product's life cycle.

Packaging

We offer a broad packaging portfolio and have the expertise in supporting you with design, labelling and packaging solution services to enhance product compliance and consumer attractiveness.

With high-capacity primary and secondary packaging solutions for solid and Liquid dosage forms, we're well positioned to streamline your supply chain and deliver a finished product from concept to shelf. With support from our Regulatory, Analytical and Quality Assurance divisions, you'll have access to the most up-to-date counsel on stability, quality assurance and safety.

Supply Chain Management

Our best practice procedures facilitate the reliable and efficient turnaround of products to meet your delivery needs.

We have developed an integrated manufacturing and packaging logistics system to allow for more efficient timelines to ensure the prompt delivery of quality products anywhere in the world.

A proven track record in delivering goods on time ensures our brand is synonymous with reliability. Our customised inventory management processes allow tracking systems to facilitate seamless supply chain management.

7-Steps Product Launch

Turn Your Ideas Into Products in just 7 Steps

Select Product

Once We Understand your Product Requirements in Detail, Our Experts Will Recommend a Few Concepts. You Select the Concepts that Best Suit Your Product and We Establish a Scientific Rationale Along with Ingredient Selection and Product Claims.

Regulatory & Feasibility Check

We take care of all quality, regulatory, and safety concerns, while ensuring compliance with the guidelines and RDA limits for ingredients. We also perform feasibility checks and identify the market positioning of the product for launch

Conceptualise Formula

Once the Paper Formula is Ready, We Send You the Formulation Specs for Approval. At this Point, We Also Establish Product Format and Claims. We Deliver Only the Best Formulas to Bring Your Product to Life

Commercial Manufacturing

We Complete the Technology Transfer for the Batches and Kickstart Volume Production.

Stability Studies

We Follow ICH Guidelines for Stability Studies the Product Shelf Life.

Product Development

Post Completion of the Pre Formulation Trials to Assess Ingredient and Format Compatibility, We Optimise Formulation of the Final Product with a Lab Scale Trial Batch to Give You an Experience of the Finished Product in Real Time. Post Approval of this Development, Batches are Scaled.

Product Launch

We Help You Launch and Market Your Product by Advising You on How Your Product Can be Positioned to Meet the Consumer's Needs.

Offerings

14 Categories
400 + Licensed Product Formulation (Domestic & Export)
75 + Commercialized Products (in the Domestic & Export Market)

Combinations

A signature Concept Offering a Range of Possibilities

Original Capsules

Beadlet Capsules

Combi Beadlet Capsules

Combi Capsules

Tab Capsules

Suspension Capsules

Liquid Capsules

Our liquid capsules range offers significant benefits to both nutraceutical brands and end consumers

Consumer preference | Improved bioavailability | Commercial perks

Product Stability
Improved self-life

Enhanced product profil
Fast action + Sustained/Controlled action

Ingredient compatibility
Easy delivery of challenging formulations

Unique product branding
Variety od colour + print options

Capsules
High quality + Clean Label + Vegetarian

Encapsulation
Taste + odour masking protection

High product integrity
Tamper - proof + leak - proof

Combination options
Liquids + mini capsules/granules/micro tablets

Beadlets Capsules

Pelletised Dosage forms find a Wide Variety od Uses in Nutraceutical Applications

- Enteric Coated Formulations
- Sprinkle Formulations
- Masking Taste
- Achieving Different Release Profiles
- Protecting Acid-Sensitive Ingredients
- Food Fortification

Ingredient Processing

From Agglomerate-Free Blends to Finely Coated Granules, Our Solutions help to Safely Take Your Product from Lab to Market

- Research-backed Quality Ingredients
- Augment Your Production Capacities
- Build Efficiencies
- Improve Productivity
- Decrease Operating Costs

● Effervescent Tablets

**Calcium Carbonate & Vitamin D3
Effervescent Tablet**

Zingiber Officinale Effervescent Tablet
